

A Warm Welcome to you! Thank you for coming to our practice.

Doctors of Chiropractic have extensive educational backgrounds, which include a Bachelor of Science, Biochemistry, Nutrition, as many Pathology hours as an M.D. and a year in the Cadaver lab. There are National and State Board exams which must be passed.

D.Cs are licensed by the State of California to advise on the health of the spine and nervous system as well as nutrition and supplements, exercise, and natural health.

Dr. Sheehan has been an I.C.U. nurse with babies and children for 15 years, bringing her knowledge of Allopathic Medicine to your care. In addition to this, Dr. Sheehan underwent 8 additional years of training in the C1 vertebrae and neurology surrounding the brainstem to become certified as an Atlas Orthogonalist.

You will get much more out of your care if you agree to follow care recommendations. These are based upon scoring your level of pain with the findings of your exams and x-rays. These are averaged together and help the doctor determine your frequency of care.

We look forward to giving you care and the wonderful experience of great health!

Dr. Sheehan and staff
